ASSYST at a Glance

ASSYST's Federal Solutions specialize in Information Technology (IT) infrastructure, applications and IT management for the Federal government. ASSYST's approach is tailored for Federal agencies to bring together acquisition planning, contract management, account management and program management with service excellence.

ASSYST's FEDERAL SOLUTIONS

As a trusted and reliable partner, ASSYST delivers integrated and effective mission solutions that are aligned to the department's and agency's strategy. As a strategic partner, ASSYST works with agencies to improve customer service and automate business processes in the following service areas:

- Infrastructure
- Applications
- IT Management
- Ancillary Services

ASSYST's accomplishments include end-to-end solutions for departments and agencies that span the complete life cycle for all hardware, software and services, and include the following activities:

- Project Planning
- Requirements Analysis
- System Design
- Software Development
- System Implementation
- Testing and Verification
- Information Assurance
- Operations and Maintenance
- Research and Development
- Disposition and Retirement

ASSYST's Federal Solutions include all of the services and components required for an integrated IT solution. This involves legacy systems, current technology and emerging technologies that evolve over system development life cycle. ASSYST provides IT solutions through a broad range of services which include the integration of various technologies critical to the Agency's mission objectives.

ASSYST took, and continues to take, the time to fully understand our needs. This is not all, they also bring up questions and options that we had not considered. This is really how we know they get it.
